

SERIES AZ 3004, 3604 & 3624 AZ 3007 & 3627

1/4 INCH DIAPHRAGM VALVE — HIGH PRESSURE
Springless – manual and pneumatic (NC)

- Operating pressures to 4,500 psig (310 bar)
- Replaceable seat
- Stainless steel 316L
- Captured seat option (OX) for high pressure oxygen service and oxidizer
- LOTO and indicating switch options
- Constant bleed option 5, 8 and 15 slpm of N₂ @ 80 psig (5.5 bar) refer to PN 430
- Surface finish 10 μin. (0.25 μm) Ra standard
- Multi-port options available (refer to page 4)
- Installation and operating instructions available at www.aptech-online.com in the Tech Briefs section

Manual valves

	PSIG / BAR	
	3,700 / 255	4,500 / 310
AZ 3604 – Round knob, multi-turn	●	
AZ 3624 – Lever valve, 1/4 turn – LOTO, PL 225 optional – Lever position indicates valve status	●	
AZ 3627 – T handle valve, 1/4 turn – Handle position indicates valve status		●

Pneumatic valves, normally closed (NC)

	PSIG / BAR	
	3,700 / 255	4,500 / 310
AZ 3004 – Switch option for remote monitoring	●	
AZ 3007 – Switch option for remote monitoring		●

PORTING CONFIGURATIONS

- Valves are illustrated top view looking down through the valve. Mounting holes on the valve bottom are shown for reference.
- INLET (Upstream) is defined as a port connected to the region below the valve seat. It is illustrated with an arrow pointing towards the valve body or an “empty” triangle on the schematic. OUTLET (Downstream) is defined as a port connected to the region above the seat and below the diaphragm. It is illustrated with an arrow pointing away from the valve body or a “filled” triangle on the schematic.
- The traditional flow direction is INLET to OUTLET, but AP Tech valves may be employed in either flow direction.
- End connections are specified in numerical order per the diagram’s numbered arrows.

CAUTION: Product selection is the sole responsibility of the user, regardless of any recommendations or suggestions made by the factory. The user shall make selections based upon their own analysis and testing with regard to function, material compatibility and product ratings. Proper installation, operation and maintenance are also required to assure safe, trouble free performance.
