Furon® PPRD2 Pump

Pneumatic Dosing Pump 8-80 mL Stroke Capability

Description

The Furon PPRD Pump is pneumatically operated: one bellows made from PTFE is driven forward and backward to deliver each dose of chemical. Furon PPRD Pumps come with either pneumatic or inductive end position sensors. They can be operated according to various modes: single shot, timer, preset number of strokes... etc, depending on the characteristics of the control unit selected.

All Furon PPRD Pump wetted components are manufactured with High Purity PFA and PTFE and are suitable for pumping even the most corrosive concentrated chemicals (acids and solvents). All other components are manufactured with high technology materials; Our pumps are assembled in our cleanroom, tested with DI water, cleaned, then double sealed in plastic bags.
