

# GO REGULATOR

## COM-2B Series

Crossover Manifold Regulator System

The COM-2B Series crossover manifold system uses two PR-1-type stainless steel regulators (PR-2-type brass, optional) built in a single body functioning as the changeover regulators with the common outlet port connected to a single line regulator to provide constant unchanging supply pressure unaffected by supply source depletion. All are mounted on a bracket complete with gauges. As the primary supply source depletes and the operating outlet pressure of the primary regulator falls below the preset changeover pressure of the secondary regulator, the secondary regulator takes over. Once this occurs, the primary regulator can be manually adjusted  $\frac{1}{8}$ -turn counterclockwise, the secondary regulator is now the primary and the depleted supply source can be replaced.

### Features & Specifications

- Bracket-mounted for easy installation
- Allows changing of cylinders during operation\*
- Available in stainless steel, brass and Monel®
- Steady outlet pressure during cylinder depletion
- 0.01% pressure control accuracy
- Inlet pressures to 6000 psig
- Outlet pressure ranges: 0–10 psig, 0–25 psig, 0–50 psig, 0–100 psig or 0–250 psig
- Changeover pressures: 15–250 psig
- Cv flow coefficients: 0.025, 0.06, 0.2, 0.5
- All connections:  $\frac{1}{4}$ " FNPT
- 20 micron inlet filters
- 316L stainless steel construction
- PTFE-lined stainless steel diaphragm
- Operating temperatures: –40° F to +500° F (–40° C to +260° C)

\* Installation of shut off valves in each inlet port is recommended for complete isolation during change out of cylinders.
