

Float Valves

Float Valves for installation in tanks NV 12, 12P

Standard Feed Valve of Cast Steel

Technical Data

Connection DN	20 - 150
Nominal Pressure PN	16
Operating Pressure	0 - 8 bar
K _{vs} -Value	2.8 - 195 m ³ /h
Temperature	110 °C
Medium	liquids

Description

Float valves automatically control liquid levels in sealed or open (non-pressurised) tanks and vessels without requiring external energy. The float registers the liquid level and directly controls the valve via a lever. A change in the liquid level immediately results in a changed flow volume.

The NV 12 and NV 12 P float valves are standard inlet (feed) valves for installation in tanks; they are made of cast iron. The valve cone is fitted with a soft seal.

NV 12P is fitted with a parallel guide which prevents float oscillation if a float bar guide is not fitted in the tank.

The following note applies to float valves fitted with float bars: If the liquid level is below the float bar i.e. if the float points downwards, a guide for the float bar should be installed.

Standard

- » ball or cylindrical float (see overleaf)
- » NV 12P with parallel guide

Options

- » various seal materials suitable for your medium
- » special versions on request

Please state working pressure range when enquiring or ordering.

Operating instructions, know how and safety instructions must be observed. All the pressure has always been indicated as overpressure. We reserve the right to alter technical specifications without notice.
