# 2-Colour Display High Precision Digital Pressure Switch 

Applicable fluid

## Air, Non-corrosive gas, Non-flammable gas

The settings of the master pressure switch (source of copy) can be copied to the slave pressure switches.

- Reduction in setting work - Prevention of mistakes in setting

Raised rubber switch buttons for easy and comfortable operation

Series ZSE40A(F)/ISE40A

Piping Variations

Space-saving

## Mounting Variations

Series

## Secret code setting function

A function to prevent operation by anyone other than the designated operator while the keys are locked.

* The set-value can be checked while the keys are locked.

Power-saving function
The display can be turned off to save the power consumption.
(Power consumption reduced by max. 20\%)

> The value disappears and decimal points start flashing.

Resolution conversion function
The flickering on the display can be eliminated.

(Only the displayed value is changed,
and there is no effect on the accuracy.)
$\mathrm{MPa} / \mathrm{kPa}$ switching function $\cdot$ -
The indication unit for vacuum, compound pressure and positive pressure can be integrated into either MPa or kPa .

kPa Stick the label (enclosed with the product) of a desired unit seal.

# 2-Colour Display High Precision Digital Pressure Switch <br> ${ }^{C T H}$ Series ZSE40A(F)//SE40A 

## Specifications

| Model |  |  |  | ZSE40A (vacuum pressure) | ZSE40AF (compound pressure) | ISE40A (positive pressure) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Rated pressure range |  |  |  | 0.0 to -101.3 kPa | -100.0 to 100.0 kPa | -0.100 to 1.000 MPa |
| Display/Set pressure range |  |  |  | 10.0 to -105.0 kPa | -105.0 to 105.0 kPa | -0.105 to 1.050 MPa |
| Withstand pressure |  |  |  | 500 kPa | 500 kPa | 1.5 MPa |
| Display/Minimum unit setting |  |  |  | 0.1 kPa | 0.1 kPa | 0.001 MPa |
| Applicable fluid |  |  |  | Air, Non-corrosive gas, Non-flammable gas |  |  |
| Power supply voltage |  |  |  | 12 to 24 VDC $\pm 10 \%$, Ripple (p-p) 10\% or less (with power supply polarity protection) |  |  |
| Current consumption |  |  |  | 45 mA or less |  |  |
| Switch output |  |  |  | NPN or PNP open collector 2 outputs (Selectable) |  |  |
|  | Maximum load current |  |  | 80 mA |  |  |
|  | Maximum applied voltage |  |  | 28 V (at NPN output) |  |  |
|  | Residual voltage |  |  | 1 V or less |  |  |
|  | Response time |  |  | 2.5 ms (with anti-chattering function: $20,100,500,1000,2000 \mathrm{~ms}$ ) |  |  |
|  | Short circuit protection |  |  | Yes |  |  |
| Repeat accuracy |  |  |  | $\pm 0.2 \%$ F.S. $\pm 1$ digit |  |  |
| Hysteresis | Hysteresis mode |  |  | Variable (0 or above) Note 1) |  |  |
|  | Window comparator mode |  |  |  |  |  |
| Analogue output | Note 2) <br> Voltage output |  | Output voltage <br> (Rated pressure range) | 1 to $5 \mathrm{~V} \pm 2.5 \%$ F.S. |  | 0.6 to $5 \mathrm{~V} \pm 2.5 \%$ F.S. |
|  |  |  | Linearity | $\pm 1 \%$ F.S. or less |  |  |
|  |  |  | Output impedance | Approx. $1 \mathrm{k} \Omega$ |  |  |
|  | Note 3) <br> Current output |  | Output current <br> (Rated pressure range) | 4 to $20 \mathrm{~mA} \pm 2.5 \%$ F.S. |  | 2.4 to $20 \mathrm{~mA} \pm 2.5 \%$ F.S. |
|  |  |  | Linearity | $\pm 1 \%$ F.S. or less |  |  |
|  |  |  | Load impedance | Maximum load impedance: $300 \Omega$ (Power supply voltage 12 V )$600 \Omega$ (Power supply voltage 24 V )Minimum load impedance: $50 \Omega$ |  |  |
| Auto-shift input |  |  |  | Non-voltage input (Reed or Solid state), Low level: 0.4 V or less, 5 ms or longer input |  |  |
| Display |  |  |  | $31 / 2$-digit, 7-segment, 2-colour LCD (Red/Green) |  |  |
| Display accuracy |  |  |  | $\pm 2 \%$ F.S. $\pm 1$ digit (Ambient temperature of $25 \pm 3^{\circ} \mathrm{C}$ ) |  |  |
| Indicator light |  |  |  | Lights up when output is turned ON. OUT1, OUT2: Orange |  |  |
| Environment resistance |  | Enclosure |  | IP65 |  |  |
|  |  | Operating temperature range |  | Operating: -5 to $50^{\circ} \mathrm{C}$, Stored: -10 to $60^{\circ} \mathrm{C}$ (No freezing or condensation) |  |  |
|  |  | Operating humidity range |  | Operating/Stored: 35 to 85\% RH (No condensation) |  |  |
|  |  | Withstand voltage |  | 1000 VAC for 1 minute between live parts and case |  |  |
|  |  | Insulation resistance |  | $50 \mathrm{M} \Omega$ or more between live parts and case (at 500 VDC Mega) |  |  |
|  |  | Vibration resistance |  | 10 to 150 Hz at whichever is smaller of 1.5 mm amplitude or $20 \mathrm{~m} / \mathrm{s}^{2}$ acceleration, in $\mathrm{X}, \mathrm{Y}, \mathrm{Z}$ directions, for 2 hours each (De-energized) |  |  |
|  |  | Impact resistance |  | $100 \mathrm{~m} / \mathrm{s}^{2}$ in $\mathrm{X}, \mathrm{Y}, \mathrm{Z}$ directions, 3 times each (De-energized) |  |  |
| Temperature characteristics |  |  |  | $\pm 2 \%$ F.S. (Based on $25^{\circ} \mathrm{C}$ ) |  |  |
| Lead wire |  |  |  | Oilproof heavy-duty vinyl cable <br> ø3.5, 2 m Conductor area: $0.15 \mathrm{~mm}^{2}$ (AWG26) Insulator O.D.: 0.95 mm |  |  |
| Standards |  |  |  | CE marking, UL (CSA), RoHS compliance |  |  |

Note 1) If the applied voltage fluctuates around the set-value, the hysteresis must be set to a value more than the fluctuating width, otherwise chattering will occur. Note 2) When the analogue voltage output is selected, the analogue current output cannot be selected.
Note 3) When the analogue current output is selected, the analogue voltage output cannot be selected.

## Piping Specifications

## 2-Colour Display High Precision Digital Pressure Switch Series ZSE40A(F)/ISE40A

## Dimensions

## Panel fitting dimensions

Note) This is the minimum value for the piping method 01 or N01.
Take the piping material and tubing into account for design. When the corner is to have radius, it must be R3 or less.

## Series ZSE40A(F)/ISE40A

## Function Details

## A Copy function (F97)

The settings of the master pressure switch can be copied to several slave pressure switches.
This can reduce the labour for setting and prevent the entry of incorrect set-values.
The set-value can be copied to up to 10 switches simultaneously.
(Maximum communication distance 4 m )

1) Wire as shown in the left figure.
2) Select the slave switch which is to be the master, and change it into a master using the buttons. (In the default setting, all switches are set as slaves.)
3) Press the (S button of the master switch to start copying.

## B Auto-preset function (F 4)

Auto-preset function, when selected in the initial setting, calculates and stores the set-value from the measured pressure.
The optimum set-value is determined automatically by repeating vacuum and break with the target work piece several times.

## Suction Verification

## C Display calibration function (F 6)

Fine adjustment of the indicated value of the pressure sensor can be made within the range of $\pm 5 \%$ of the read value.
(The scattering of the indicated value can be eliminated.)

Note) When the display calibration function is used, the set pressure value may change $\pm 1$ digit.

Formula for Obtaining the Set-Value

| P_1 or P_2 | H_1 or H_2 |
| :---: | :---: |
| P_1 (P_2) $=A-(A-B) / 4$ |  |
| $n \_1\left(n \_2\right)=B+(A-B) / 4$ | $H \_1\left(H \_2\right)=(A-B) / 2$ |

## D Peak and bottom display function

This function constantly detects and updates the maximum (minimum) value and allows to hold the maximum (minimum) pressure value.
When the (B) (®) buttons are simultaneously pressed for 1 second or longer, while "holding", the hold value will be reset.

## E Key lock function

This function prevents incorrect operations such as accidentally changing the set-value.

## F Zero-clear function

This function clears and resets the zero value on the display of measured pressure.
For the pressure switch with analogue output, the analogue output shifts according to the indication. The indicated value can be adjusted within $\pm 7 \%$ F.S. of the pressure when ex-factory. (ZSE40AF (for compound pressure) $\pm 3.5 \%$ F.S.)

## 2-Colour Display High Precision Digital Pressure Switch

The F $\square$ in brackets shows the function code number. Refer to the Operation Manual for the details of operation procedures and

## G Error indication function

| Error name | Error code | Description | Remedy |
| :---: | :---: | :---: | :---: |
| Overcurrent error | Eri | Load current of switch output (OUT1) exceeds 80 mA . | Turn the power off and remove the output factor for the overcurrent. Then, turn the power on. |
|  | Eric | Load current of switch output (OUT2) exceeds 80 mA . |  |
| Residual pressure error | ErJ | During zero-clear operation, pressure over $\pm 7 \%$ F.S. is applied. (ZSE40AF (compound) $\pm 3.5 \%$ F.S.) <br> After 1 second, the mode will reset to measurement mode. $\pm 1 \%$ F.S. of the zero-clear range varies between individual products. | Perform zero-clear operation again after restoring the applied pressure to an atmospheric pressure condition. |
| Applied pressure error | HMCH | Supply pressure exceeds the maximum set pressure. | Reset applied pressure to a level within the set pressure range. |
|  | LLI | Supply pressure is below the minimum set pressure. |  |
| Auto-shift error | 1.15 | The value measured at the time of auto-shift input is outside the set pressure range. <br> * After displaying the error code for about 1 second, the switch returns to the measuring mode. | The controller does not respond to the auto-shift signal. Check the equipment and machinery for this point. |
| System error | ERI] | Internal data error | Turn the power off and turn it on again. If the failure cannot be solved, ask SMC for repair. |
|  | $E \sim H$ |  |  |
|  | $E F$ |  |  |
|  |  |  |  |
|  |  |  |  |
|  | Erg |  |  |

If the above remedy cannot recover the operation, ask SMC for repair.

## H Anti-chattering function (F 3)

A large bore cylinder or ejector consumes a large volume of air in operation and may experience a temporary drop in the supply pressure. This function prevents detection of such temporary drops in the supply pressure as an error.

Available response time settings
$20 \mathrm{~ms}, 100 \mathrm{~ms}, 500 \mathrm{~ms}, 1000 \mathrm{~ms}, 2000 \mathrm{~ms}$

## <Principle>

This function averages pressure values measured during the response time set by the user and then compares the average pressure value with the pressure set point value to output the result on the switch.

I Display unit switching function (F 0)
Display units can be switched with this function.

| Display unit <br> Minimum unit setting | 口斤 |  | 5 F | ERIF | 951 | mint |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | kPa | MPa Note) | kgf/ $\mathrm{cm}^{2}$ | bar | psi | inHg | mmHg |
| ZSE40A (vacuum pressure) | 0.1 | 0.001 | 0.001 | 0.001 | 0.01 | 0.1 | 1 |
| ZSE40AF (compound pressure) | 0.1 | 0.001 | 0.001 | 0.001 | 0.02 | 0.1 | 1 |
| ISE40A (positive pressure) | 1 | 0.001 | 0.01 | 0.01 | 0.1 |  |  |

Note) The ZSE40A (vacuum pressure) and ZSE40AF (compound pressure) will have different setting and display resolution when the unit is set to MPa .

## Series ZSE40A(F)/ISE40A

## Function Details

The F $\square$ in ( ) shows the function code number. Refer to the Operation Manual for the details of operation procedures and function codes.

## J Power-saving mode (F80)

Power-saving mode can be selected.
It shifts to the power-saving mode without button operation for 30 seconds. It is set to the normal mode (Power-saving mode is OFF.) when ex-factory. (Decimal points and operation indicator light (only when the switch output is turned ON) blink in the power-saving mode.)

## K Secret code setting (F81)

It can be set whether secret code input is required or not when key is locked. It is set to input no secret code when ex-factory.

## L Auto-shift function (F 5)

When there are large fluctuations in the supply pressure, the switch may fail to operate correctly. The auto-shift function compensates such supply pressure fluctuations. It measures the pressure at the time of auto-shift signal input and uses it as the reference pressure to correct the set-value on the switch.

Set-value correction by auto-shift function

* Rectified value

When the auto-shift is selected, "ooo" will be displayed for about 1 second, and the pressure value at that point will be saved as a rectified value "[_5". Based on the saved rectified values, the set-value Note) of " $P_{-}$", " $H_{-}$!", " $\boldsymbol{P}_{-}$" ", and " $H_{-}$" will likewise be rectified.

Note) When an output is reversed, "n_l", "H_l", " $n_{-}$?", "H_Z" will be rectified.

## Possible Set Range for Auto-Shift Input

|  | Regulating pressure range | Possible set range |
| :---: | :---: | :---: |
| Compound pressure | -105.0 to 105.0 kPa | -210 to 210 kPa |
| Vacuum pressure | 10.0 to -105.0 kPa | 115.0 to -115.0 kPa |
| Positive pressure | -0.105 to 1.050 MPa | -1.155 to 1.155 MPa |

## Auto-shift zero

The basic function of auto-shift zero is the same as the function for auto-shift. Also, it corrects values on the display, based on a pressure value of " "Wwhen the auto-shift is selected.

## Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) Nota 1), and other safety regulations.

[^0]
## © Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.
2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.
3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
5. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
6. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
7. An application which could have negative effects on people, property, or animals requiring special safety analysis.
8. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

## Safety Instructions

## $\triangle$ Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

## Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements". Read and accept them before using the product.

## Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered. Note 2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

Note 2) Vacuum pads are excluded from this 1 year warranty.
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

## Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed. Series ZSE40A(F)/ISE40A
Specific Product Precautions 1
Be sure to read before handling.
Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for Pressure Switches Precautions.

## Handling

## $\triangle$ Caution

1. Do not drop, bump, or apply excessive impacts (100 $\mathrm{m} / \mathrm{s}^{2}$ ) while handling. Although the body of the sensor may not be damaged, the internal parts of the sensor could be damaged and lead to a malfunction.
2. The tensile strength of the cord is 49 N . Applying a greater pulling force on it can cause a malfunction. When handling, hold the body of the sensor - do not dangle it from the cord.
3. Do not exceed the screw-in torque of 7 to $9 \mathrm{~N} \cdot \mathrm{~m}$ when connecting the pipe to the switch. Exceeding this torque may cause the switch to malfunction.
4. Do not use pressure sensors with corrosive and/or flammable gases or liquids.

## Connection

## $\triangle$ Caution

1. Incorrect wiring can damage the switch and cause a malfunction or erroneous switch output.
2. Connections should be done while the power is turned off.
3. Wire separately from power lines and high voltage lines, avoiding wiring in the same conduit with these lines. Malfunctions may occur due to noise from these other lines.
4. If a commercial switching regulator is used, make sure that the F.G. terminal is grounded.

## Operating Environment

## $\triangle$ Warning

1. This pressure switch is CE marked; however, it is not equipped with surge protection against lightning. Lightning surge countermeasures should be applied directly to system components as necessary.
2. This pressure switch does not have an explosion proof rating. Never use in the presence of an explosive gas as this may cause a serious explosion.

## Operating Environment <br> $\triangle$ Caution

1. Do not use the product in a place where it could be splashed by oils or solvents.
2. When this pressure switch is used in a place where water and dust splash on, water and dust may enter inside the switch through the atmospheric vent port. Insert a ø4 tube (I.D. ø2.5) into the atmospheric vent port, and bring piping of the opposite side up to the safe position to keep it from water and dust. Do not bend the tube or close the hole of it. It causes malfunction with the measurement of positive pressure.

* Make sure that the tube is inserted to the end of the atmospheric vent port.
* Use SMC tubing, TU0425. (Material: Polyurethane, Tube O.D. ø4, I.D. ø2.5)

3. Take measures against static electricity with equipment when this switch is used in connection with resin piping. Also, the ground should be separate from that of the units that generate strong electromagnetic noise or high frequency, otherwise, the switch can be damaged by static electricity.

# Series ZSE40A(F)/ISE40A Specific Product Precautions 2 

Be sure to read before handling.
Refer to back pages 1 and 2 for Safety Instructions, "Handling Precautions for SMC Products" (M-E03-3) for Pressure Switches Precautions.

## Mounting

## $\triangle$ Caution

1. Mounting with panel mount adapter

## 2. Mounting with bracket

Mount a bracket to the using two mounting screws and install on piping. The switch can be installed horizontally depending on the installation location.

The tightening torque for bracket mounting screw should be 0.5 to $0.7 \mathrm{~N} \cdot \mathrm{~m}$ for M 3 and 1.4 to $1.6 \mathrm{~N} \cdot \mathrm{~m}$ for M 4 .

## Set Pressure Range and Rated Pressure Range

## $\triangle$ Caution

Set the pressure within the rated pressure range.
The set pressure range is the range of pressure that is possible in setting.
The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) on the switch.
Although it is possible to set a value outside the rated pressure range, the specifications will not be guaranteed even if the value stays within the set pressure range.

| Switch |  | Pressure range |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | -100 kPa | 0 | 100 kPa | 500 kPa | 1 MPa |
| For vacuum pressure | ZSE40A | $\begin{aligned} & -101.3 \mathrm{kPa} \\ & -105 \mathrm{kPa} \end{aligned}$ | $0$ |  |  |  |
| For compound pressure | ZSE40AF | $\begin{array}{r} -100 \mathrm{kPa} \\ -105 \mathrm{kPa} \end{array}$ |  | $\begin{gathered} 100 \mathrm{kPa} \\ 105 \mathrm{kPa} \end{gathered}$ |  | 1 |
| For positive pressure | ISE40A | $\begin{gathered} -100 \mathrm{kPa} \\ -105 \mathrm{kPa} \\ (-0.105 \mathrm{MPa}) \end{gathered}$ | i |  |  | 1 MPa <br> 1.05 MPa |

## Related Equipment

## 2-Colour Display High Precision Digital Pressure Switch ZSE/ISE30A

| Series | Type | Rated pressure range |
| :--- | :--- | :---: |
| ZSE30AF | Compound pressure | -100.0 to 100.0 kPa |
| ZSE30A | Low pressure/vacuum | 0.0 to -101.0 kPa |
| ISE30A | Positive pressure |  |

## 2-Colour Display Digital Pressure Switch ZSE/ISE80

| Series | Type | Rated pressure range |
| :---: | :---: | :---: |
| ZSE80F | Compound pressure | -100.0 to 100.0 kPa |
| ZSE80 | Vacuum pressure | -101.0 to 0.0 kPa |
| ISE80 | Positive pressure | -0.100 to 1.000 MPa |
| ISE80H | Positive pressure | -0.100 to 2.000 MPa |
| Features | - Suitable for a wide variety of fluids with stainless diaphragm <br> - IP65 <br> - RoHS compliant <br> - Low leakage. VCR ${ }^{\circledR}$, Swagelok ${ }^{\circledR}$ compatible fittings can be selected. <br> - With one-touch fittings (Straight, Elbow) <br> - Back piping, underside piping |  |

Note) $\mathrm{VCR}^{\circledR}$ and Swagelok $^{\circledR}$ are trademarks of Swagelok Company.
