

Pressure Control Valves

Safety Valves SV 29L

Threaded Valve for High Pressures

Technical Data

Connection DN	15 - 25
Connection G	3/8A - 1A
Nominal Pressure PN	40 - 400
Set Pressure	93 - 365 bar
Temperature	280 °C
Medium	liquids, gases, steam

Description

Safety valves are the ultimate protection device for tanks and pipelines. They prevent pressure limits being exceeded once all automatic control and monitoring equipment has failed.

SV 29L ist ein federbelastetes Normal-Sicherheitsventil mit Gewindeanschluss und geschlossener Federhaube für hohe Ansprechdrücke. Bauteilprüfung für Anschlussgrößen für Gase bis 365 bar, für Dampf und Flüssigkeiten bis 180 bar .

Normal safety valves initially open proportionally up to a pressure rise of 10 %. This initial phase is followed by the full opening of the valve, allowing a large flow of medium.

Especially in the case of liquids, the wide proportional range results in a continuous operation.

Pressure rise:

above 1 bar set pressure:10 % up to required valve lift;
below 1 bar set pressure:0.1 bar.

Options

- » special connections: ANSI flanges, NPT, other connections on request
- » special versions on request

Operating instructions, know how and safety instructions must be observed. All the pressure has always been indicated as overpressure. We reserve the right to alter technical specifications without notice.
