Custom Services

Custom Services Prospectus

Many of our customers are today tasked to do more with less and our Custom Services division has been developed to enable us to work closer with you by providing a range of product training and education, consultancy and product assembly solutions.

Whatever your needs, contact us today.

What our customers say about us:

"Can I thank you for organising a very useful and informative training session regarding your range of Duolok tube fittings for all the technical staff in the department. I have had nothing but positive feed back from all those that attended. From our point of view it was a very successful day and the guys came away with the confidence to work with high pressure fittings."

Cryogenic Technical Manager, University

"Just like to take the opportunity to thank you for taking the time to visit us. The feedback from the training program is excellent on both the content and the delivery."

Supply Chain Manager, Diving Equipment Company

"Boiswood has always provided us with great support as well as quality products. In particular your response to our recent technical challenges was appreciated, ensuring we were able to provide our client with a great solution."

Director, Airflow Control Systems Company

"The seminar provided was very good, informative and the material including the graphics were first rate. The seminar will have sparked some interest that our applications engineers will use and become familiar with your products. Thank you again for a very enjoyable and informative presentation."

Special Product Manager, Mechanical Seals Company

"Boiswood have proved themselves to be a reliable and flexible supplier of Cryogenic Valves and Instrumentation fittings to us. Their excellent customer service and ability to react quickly to our requirements means we would have no hesitation in recommending them as a supplier."

Purchasing Administrator, Cryogenic Engineering Company

"I would like to take this opportunity to convey how impressed we are by the levels of service we have experienced from Boiswood. It is a refreshing change to conduct business with a company that continually provides a quality service in terms of supply of goods to sound and effective communication and I would not hesitate in recommending Boiswood to others based on the experience we have been fortunate to receive."

Training & Education Classes

Pressure Regulators Seminar

ORDER NUMBER: BOIT101

Selecting the correct pressure regulator to suit your needs can be a complex exercise with several factors to consider. Our three hour seminar has been developed to help you understand more about our pressure regulators and during this seminar you will learn more about:

- The basic functions of a pressure regulator
- Analysis of different models including pressure reducing, back pressure, heated, vaporising and tank blanketing
- How to correctly size and specify pressure regulators
- Identifying problems and ways to rectify any performance issues
- Build and repair training exercises

This seminar is aimed at facility managers, design engineers, technicians, production operatives, buyers and maintenance personnel.

CIRCOR ENERGY | GO Regulator

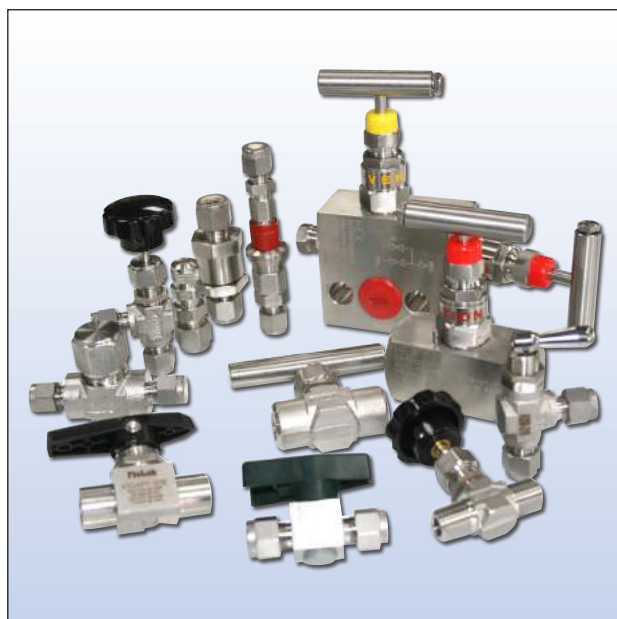

Valve Selection Seminar

ORDER NUMBER: BOIT102

With so many valve options to choose from selecting the right valve can be challenging. Throughout this three hour seminar you will learn about the different types of instrument and process valves we offer together with their functions. Specifically you will learn more about:

- Ball Valves
- Check/Non-return Valves
- Needle Valves
- Instrument Manifolds
- Metering Valves
- Plug Valves
- Purge/Bleed Valves
- Particulate Filters
- Quick Connects

This seminar is ideal for anybody who has a vested interest in the safe handling of gas and liquids. Typical attendees will include design engineers, quality managers, maintenance supervisors, laboratory technicians and engineering students.

HEXVALVE | **SSP**

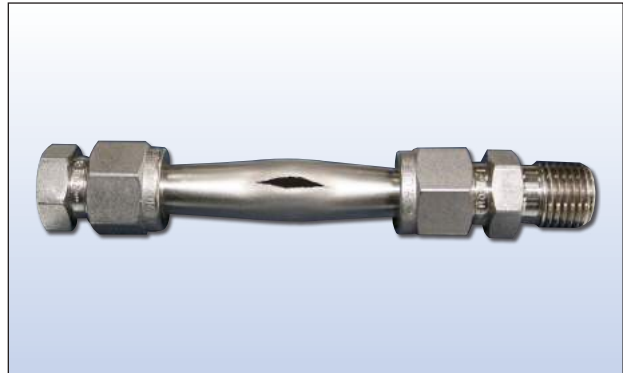

Duolok Tube Fittings Seminar

ORDER NUMBER: BOIT103

This three hour seminar explores the many benefits of the gaugeable Duolok Tube Fitting products as manufactured by our Supply Partner SSP. Typical topics include:

- How the Duolok Tube Fitting works
- The factors which make the Duolok Tube Fitting unique
- Hands-on tube fitting installation exercises
- Typical safety considerations
- How to avoid installation problems
- Selection and correct handling of tubing
- Tube bursting exercise

This seminar is specifically aimed at people who need to have an understanding of tubing systems, tube fitting components and their importance. It is ideal for design and safety engineers, quality managers, apprentices, buyers and engineering students.

Duolok Tube Fittings Safe Installation Course

ORDER NUMBER: BOIT104

This challenging one-day course builds on the concepts of the Duolok Tube Fittings Seminar and focusses on each aspect needed to achieve right-first-time installations. You will typically learn more about:

- Advantages of tubing versus pipe systems
- Tubing burst pressures
- Tube bending exercises
- Reassembly procedures
- Understanding why tube fittings can leak
- Thread forms and their characteristics
- Correct use of pipe thread sealants
- Installation tooling overview and use
- How to correctly install tube runs
- Practical and Theoretical examinations

On successful completion each attendee will receive a Boiswood / SSP certificate (valid for three years), their practical exam work and course workbook. This course is aimed at people who already have some basic hands-on experience of tubing system installation and is ideal for technicians, production installers, maintenance personnel and research students.
